

# H-BOX308 Wiring Box

H-BOX308

## Description

H-box308 wiring box, with 8 circuits and AC230V output voltage, supplies the power directly to the actuators on the manifolds branches. The on/off of actuator is controlled by the room thermostat through the wiring center.

## Features

- > Apply to the room constant temperature control system
- > Connecting the valves and room thermostats for central control
- > 8 circuits for room thermostat individual control
- > 2 potential-free output
- > Adjustable linkage signal delay time
- > Safety, reliable, standard and easy to maintenance

## Technical data

Voltage	AC230V±15%
Frequency	50Hz/60Hz
Current	Max 4A
Linkage interface	Normal open potential-free contact switch
Adjusted delay time	0min, 1min, 3min, 5min
Circuit numbers	8 Circuits
Protection class	IP40
Ambient temperature	-5~50°C
Humidity	< 95%RH
