

“SMARTHIVE” Gateway: “brain” of the MIBEE system

Easy access to your home network

Flexible network configuration: Only one network cable that can access the Internet is plugged into the SMARTHIVE to ensure the stable smart home experience

Remote control via cloud services

Operate your smart device from anywhere. In order to use the remote control service, your SMARTHIVE must be online, and you also need to register a miBEE APP account, but this is very simple for you

Multi-SMARTHIVE networking

when the project has a lot of equipment or a large area, multiple SMARTHIVE can be used for joint control to minimize the workload of wiring.
